

PEDRO GENTIL REGATO DE OLIVEIRA SOARES

ANALYTICAL SOLUTIONS ARCHITECT | APPLIED STATISTICS |
ML/NLP & GENAI | PYTHON | DATA & GOVERNANCE

Rio de Janeiro - RJ | pedro.regato@gmail.com | +55 21 99330-6338 | LinkedIn

KEY SKILLS

STATISTICS & MODELING

- Descriptive/Inferential Statistics
- Hypothesis Testing & Validation
- Probabilistic/Predictive Modeling
- Time Series
- Discriminant Analysis

AI & DATA ENGINEERING

- Machine Learning (Scikit-learn)
- Deep Learning (PyTorch/Keras)
- NLP & LLMs (OpenAI, Llama, RAG)
- Prompt Engineering
- ETL/ELT & Advanced SQL

DEVELOPMENT & GOVERNANCE

- Python (Pandas, NumPy, FastAPI)
- R (Tidyverse, Shiny)
- BPMN & Process Automation
- Data/AI Governance
- Agile Methodologies (Scrum/Kanban)

ACADEMIC BACKGROUND

MBA in Strategic and Economic Business Management
Institution: Fundação Getúlio Vargas - FGV, August/2014

Extension in Structured Systems Analysis and Design

IMPACT HIGHLIGHTS

- R\$ 27.3 million: reduction in legal provisions with 4,977 lawsuits cleansed and 92% accuracy in critical classifications (SJUR project).
- >97% accuracy: and >50% reduction in human effort in academic document classification, with governed operation at scale (CIDA project).
- ~30% reduction: in remaining execution time on a critical project (Xerox Brasil consulting), through an innovative solution applied in a real-world scenario.
- Governance Transformation: Migration of 'static' flows (SharePoint/email) to integrated operation (BPMN/Workflow/ECM + AI) in FGV Internal Audit.

PROFESSIONAL PROFILE | VALUE PROPOSITION

I am a professional with a background in Statistics and a T-shaped profile: depth in quantitative modeling and analytical reasoning, with broad application in business processes, automation, and technology.

My trajectory evolved from solutions based on modeling and simulation (logistics/operational) to Data Science, Machine Learning, NLP, and Applied AI initiatives. Not every challenge required formal statistics - but the rigor of hypothesis, evidence, measurement, and risk has always guided my technical and business decisions.

My differentiator lies in integrating Model -> System -> Process. Instead of isolated analyses, I design operable solutions (data, automation, governance, observability, and cost) that are sustainable from an institutional perspective.

PROFESSIONAL EXPERIENCE & RELEVANT PROJECTS

FUNDAÇÃO GETÚLIO VARGAS (FGV)

2014 - Present

Senior Statistician | Analytical Solutions Architect

- Technical leadership in AI/ML and automation projects for corporate areas (Legal, Audit, Academic), acting from conception (PoC) to productization and governance.
- Development of data pipelines and predictive/classificatory models (Python, Scikit-learn, NLP) integrated with management systems (BPMN/ECM).
- Technical mentorship and dissemination of Data-Driven culture for business and IT teams.

KEY SKILLS

STATISTICS & MODELING

- Descriptive/Inferential Statistics
- Hypothesis Testing & Validation
- Probabilistic/Predictive Modeling
- Time Series
- Discriminant Analysis

AI & DATA ENGINEERING

- Machine Learning (Scikit-learn)

ACADEMIC BACKGROUND

MBA in Strategic and Economic
Business Management

Institution: Fundação Getúlio Vargas - FGV, August/2014

Extension in Structured Systems Analysis and Design
Institution: Rio de Janeiro State University - UERJ, Dec/1990

B.S. in Statistics
Institution: Department of Mathematics and Statistics, Rio de Janeiro State University - UERJ, Dec/1990

LANGUAGES

- Portuguese (Native)
- English (Advanced/Fluent)

PUBLICATIONS

- LEARN MATE - Multi Agent AI Tutor (LinkedIn, Dec/2025)
- Vision and Mission (LinkedIn, Jul/2018)
- Subjective Liabilities (LinkedIn, Jul/2018)
- Strategy in Action (LinkedIn, Jun/2018)

XEROX BRASIL (CONSULTING)

2012 - 2014

Senior Process & Statistics Consultant

- Action in critical print outsourcing and document management projects.
- Application of statistical modeling for SLA optimization and resource sizing.
- Recovery of a project in crisis (turnaround) through process redesign and scenario simulation.

INDEPENDENT CONSULTING

2008 - 2012

Statistician & Business Consultant

- Market intelligence, risk analysis, and financial modeling projects for mid-sized clients.
- Development of dashboards and decision support tools.

TESTIMONIALS

"Decisive innovation at a critical moment: proposed and executed a solution with controlled technical risk, generating ~30% savings in remaining time and allowing delivery ahead of schedule. Brilliant and reliable professional."

- Rodrigo Monteiro Gaio - PMP | IT Project Manager (Xerox Brasil)

"Business-solution driven professional, highly committed to results and technical rigor. Delivers simple and brilliant solutions, with vision, ethics, reliability, and strong relationship and leadership skills."

- Joaquim Santos Neto - CIO | Digital Transformation

"Consultant with vast experience in IT solutions, recognized for professionalism and responsibility. Acted in a pioneering ICT Service Management (ITIL v3) project at PMESP, designing and implementing the management model."

- Aécio Dornelas - MBA, PMP, CBPP - Client

"Professional attentive to details, focused on results, patient, and engaged in problem-solving."

- Marcel Dubiella - IBM Maximo Senior Consultant
