

PEDRO GENTIL REGATO DE OLIVEIRA SOARES

AI PRODUCT BUILDER | GENAI & AI AGENTS | ANALYTICAL SOLUTIONS
ARCHITECT | STATISTICIAN | SENIOR BPM - END-TO-END AUTOMATION

ABOUT ME

Statistician & Senior BPM | From process automation to AI in production - solutions that integrate model, flow and system.

AUTHORED PORTFOLIO

- Process2Diagram - multi-agent multi-provider, self-authored (Python · custom Orchestrator + LangGraph)
- DataJud Monitor - multi-court legal platform, self-authored (Streamlit · Supabase)
- LearnMate - multi-agent tutor (Kaggle/Google, Nov/2025)
- Echoes of Climate - RAG-based analysis (Kaggle/Google, Apr/2025)

SKILLS

STATISTICS & MODELING

- Descriptive/Inferential Statistics
- Hypothesis Testing & Validation
- Probabilistic/Predictive Modeling
- Time Series
- Discriminant Analysis

AI & DATA ENGINEERING

- Classic Machine Learning (Scikit-learn · XGBoost)
- LLMs · RAG · Agent Orchestration (LangGraph, custom Orchestrator)
- NLP (spaCy) & Computer Vision
- Prompt Engineering
- ETL/ELT · Advanced SQL · SOAP/REST

BPM & AUTOMATION

- BizAgi BPM Suite · IBM Maximo SRM
- ITIL v3 · Oracle Applications
- Groovy/Grails

IMPACT HIGHLIGHTS

- AI Product Builder: SJUR (commissioned by FGV) and Process2Diagram and DataJud Monitor (authored projects, with no formal demand) - three AI products conceived, built, and operated individually, from discovery to production deployment, with no dedicated squad.
- SJUR/FGV: R\$28M in annual accounting-provision savings (legal risk reclassification), 4,980 legal cases resolved (2025) + 11,760 SERDON emails classified via LLM at 88% accuracy over a 12-month period (Aug/2025-Aug/2026) - detecting FGV citations before the case is formally known. Cross-referencing with the DataJud/CNJ API has already investigated 19,560 cases.
- 96% accuracy (Macro F1: 0.96) in automatic classification of FGV's academic archive (6,228 documents processed): classic NLP/ML pipeline (scikit-learn + spaCy) with multi-engine OCR (Tesseract, PyMuPDF, Tika), trained on HPC and served via a hardened Flask/JWT API in production (CIDA project).
- Process2Diagram (self-authored project, identified before any demand): 13 AI agents, orchestrated by a custom Orchestrator with LangGraph applied specifically to adaptive quality retry, turn a meeting into 12 formal artifacts (BPMN 2.0, IEEE 830, IBIS, knowledge graph) in under 5 minutes - a 90% reduction in process formalization time and automatic contradiction detection across meetings. Access available on request via LinkedIn.
- ~30% reduction in remaining execution time on a critical project (Xerox Brasil), through an innovative solution - delivered ahead of schedule.

AUTHORED PROJECTS PORTFOLIO

- Process2Diagram (P2D): multi-agent AI platform (13 agents · custom Python Orchestrator · LangGraph restricted to adaptive quality retry · Supabase) turning meetings into 12 formal artifacts (BPMN 2.0, IEEE 830, SBVR, DMN, IBIS, cross-meeting knowledge graph) across 7 interchangeable LLM providers (incl. Azure OpenAI), with deterministic quality validation (AgentValidator, no LLM involved), native LGPD compliance and per-provider cost/error telemetry (FinOps) - a self-authored project, identified before any demand, 874 automated tests, in continuous production. Demo access available on request via LinkedIn.
- DataJud Monitor: self-authored web platform for batch lookup and monitoring of court cases across all Brazilian courts (STJ, TRFs, TJs, TRTs, TREs) via the public DataJud/CNJ API - automatic classification via the CNJ's Unified Procedural Table (TPU), Statute of Limitations Radar (art. 485 CPC), Excel/PDF/JSON export, and a plans/quota/admin panel (Python · Streamlit · Supabase).
- LearnMate: A Multi-Agent AI Tutor for Python (Kaggle/Google AI Agents Intensive capstone, Nov/2025) - kaggle.com/pedrogentil.
- Echoes of Climate: How Politics Has Been Shaping the Planet (Kaggle/Google GenAI Intensive capstone, Apr/2025) - kaggle.com/pedrogentil.
- Kaggle: 56 published datasets, 217 notebooks, Hull Tactical Market Prediction competition (S&P 500 excess returns, USD 100k prize) + GenAI Intensive Google/Kaggle capstone - 5 courses completed.

SKILLS

DEVELOPMENT & GOVERNANCE

- Python (Pandas · NumPy · FastAPI · Streamlit)
- Docker · Git + CI/CD (Bamboo) · BPMN · ECM (SE-Suite)
- Process Automation & Systems Integration
- Data/AI Governance · ISO 9000
- Agile Methodologies (Scrum/Kanban)

ADDITIONAL TRAINING

- 5-Day AI Agents: Intensive Vibe Coding Course with Google - Google/Kaggle (Jul/2026)
- Introduction to Model Context Protocol - Anthropic (May/2026)
- 5-Day Gen AI Intensive - Google/Kaggle (Apr/2025)
- 5-Day AI Agents Intensive - Google/Kaggle (Nov/2025)
- Kaggle Learn: Intro to ML · Intermediate ML · Feature Engineering · Intro to Deep Learning · Computer Vision (5 courses)

INTERESTS

- Yoga & meditation (regular practice)
- Cooking
- Indian mythology applied to business
- Chess / strategic thinking
- Music

PROFESSIONAL EXPERIENCE

FUNDAÇÃO GETÚLIO VARGAS (FGV)

2019 - Present

Technical Lead | Applied AI, Automation & Systems Integration

FGV direct employee (CLT) since Apr/2022; Senior Consultant allocated via MGN Informática S.A. from Apr/2019 to Mar/2022 - same role and projects throughout.

- Technical leadership on strategic AI/ML, automation, and systems integration projects for FGV's corporate areas (Legal, Audit, Academic, Contracts).
- SJUR [GenAI/LLM]: legal-AI ecosystem for FGV's Legal Affairs Office (Superintendência Jurídica), comprising (1) case monitoring and triage via CNJ/DataJud API (Python · Streamlit), with semantic validation of case status (e.g., distinguishing final judgment from definitive filing) and cross-referencing that has already investigated 19,560 cases - R\$28M in annual accounting-provision savings via legal risk reclassification, 4,980 cases resolved (2025), 3,765 flagged (Q1-2026); and (2) Official Gazette citation classifier via multi-provider LLM (DeepSeek · Gemini · Llama) with provider fallback, processing 11,760 SERDON emails over a 12-month period (Aug/2025-Aug/2026) at 88% accuracy with human review for cases below the confidence threshold.
- CIDA [NLP/ML]: classic pipeline for automatic academic document classification - 96% accuracy (Macro F1: 0.96) across 6,228 documents, with spaCy preprocessing and scikit-learn classification, multi-engine PDF extraction (Tesseract, PyMuPDF, Tika), model trained on FGV HPC and served via a Flask/JWT API with production hardening (gunicorn, rate limiting, security headers), integrated with FGV's SGC via SOAP.
- NDOC [Computer Vision]: RetinaFace for automatic detection and captioning of multiple faces in the institutional photo archive - structured metadata generation (JSON) with per-face coordinates and interactive visualization (SVG with zoom, pan and tooltips), delivered via REST API (FastAPI).
- ECM & BPM [Automation/Integration]: technical owner of content governance and process automation on SE-SUITE. Contracts Portal: 1,330 contractual instruments, end-to-end BPM pipeline with D4Sign e-signature. SE-SUITE Utils: SOAP wrappers (22+ operations), migration of 200+ documents across 28 units, FastAPI/Docker.

TRUST BUSINESS CONSULTING (own company)

2013 - 2018

Founder & Senior Consultant

- EPE - Energy Research Company: mapping and automating 90 corporate processes (National Energy Plan, Procurement, Public Tenders) in BizAgi BPM Suite, in partnership with Microware.
- PUC/Petrobras: team coordinator for development of a service management system for oil platforms (Groovy/Grails · Java · Oracle).
- Sanofi / Remer Villaça & Nogueira: design and implementation of Strategic KPI Management for Sanofi's Patent Support division - KPI diagnosis by segment (Innovative Healthcare, CHC, Generics), proactivity metrics and BizAgi automation.

INDEPENDENT CONSULTING

2006 - 2013

Senior Consultant | BPM, ITIL & Process Automation

Probank Inteligência e Tecnologia (2006-2008) · Path ITTS (2008-2011) · Partner IT (2011-2013)

- Path ITTS (partner, 2008-2011): Master ITIL v3 Consultant at PMESP - Sao Paulo State Military Police (Change, Configuration and Service Catalog Management on IBM Tivoli Maximo SRM 7.1); similar projects for Grupo Pague Menos and Multiterminais.
- Partner IT (2011-2013) - RioCard TI / FETRANSPOR: IBM Maximo implementation with Environmental Management modules (licenses, permits, penalties, appeals), Mobile Health Clinic management (CVS fleet) and SLA breach prediction algorithms (SQL/DB2); full ITIL v3 processes (Change, Problem, Configuration, Service Level).

COMMUNITY ENGAGEMENT

- Director Member - Centro Ramakrishna Vedanta Rio de Janeiro (vedantarj.org.br)
- Musical group leader at the center

LANGUAGES

- Portuguese (Native)
- English (Advanced - Reading)

- Probank (2006-2008) - Xerox Brasil: IT Asset Management process redesign and development on Oracle Applications/PLSQL/Java. Turnaround with ~30% reduction in remaining execution time, delivered ahead of schedule.

VERIFIED RESULTS

- 1,330 contractual instruments in end-to-end BPM pipeline with D4Sign digital signature (FGV Contracts Portal)
- ~30% reduction in remaining project execution time - delivered ahead of schedule, confirmed in project manager testimonial (Xerox Brasil)
- 90+ corporate processes mapped and automated in BizAgi BPM Suite for EPE (National Energy Plan)
- SLA breach prediction (SQL/DB2) + Environmental Management IBM Maximo - RioCard / FETRANSPOR
- ITIL v3 implemented at PMESP - pioneering IT Service Management project in Sao Paulo State

ACADEMIC BACKGROUND

MBA in Strategic and Economic Business Management
Institution: Fundação Getúlio Vargas - FGV, August/2014

Extension in Structured Systems Analysis and Design
Institution: Rio de Janeiro State University - UERJ, Dec/1990

B.S. in Statistics
Institution: Department of Mathematics and Statistics, Rio de Janeiro State University - UERJ, Dec/1990

TESTIMONIALS

"Decisive innovation at a critical moment: proposed and executed a solution with controlled technical risk, generating ~30% savings in remaining time and allowing delivery ahead of schedule. Brilliant and reliable professional."

Rodrigo Monteiro Gaio - PMP | IT Project Manager (Xerox Brasil)

"Business-solution driven professional, highly committed to results and technical rigor. Delivers simple and brilliant solutions, with vision, ethics, reliability, and strong relationship and leadership skills."

Joaquim Santos Neto - CIO | Digital Transformation
